

In Communication & Language we will be developing our listening and attention skills by responding to what we hear during group work and in assembly.

We will use a clear voice when speaking to others and also improve our confidence when speaking in front of the class.

In Physical Development we will be learning to move our bodies in different ways and learn how to keep our bodies clean and safe. We will move to different music and explore body shapes.

Children will continue to access the outdoor provision on a daily basis to develop their gross motor skills and coordination.

In PSED we will learn how to care for a pet and how we should treat animals. We will visit animals as part of a class trip and consider what makes people scared of some animals and how they can overcome their fears.

Through circle time we will share our thoughts and ideas with others and learn to ask questions.

Paws & Claws

In Literacy we will continue to learn our phase 2 and 3 sounds. We will be blending and segmenting words both orally and from print.

We will learn about the features of information texts and create our own fact files about animals.

In writing we will begin to write in simple sentences.

In Expressive Arts & Design we will be learning songs about animals. Using percussion instruments we will make sounds to accompany a story.

We will be using clay and salt dough to create our own animal models.

In Mathematics we will consolidate our numbers to 10 as well as using addition and subtraction to solve a range of mathematical problems. We will use the language of size to compare and order a set of objects. We will use the story "Rosie's Walk" to explore positional language.

In Understanding the World we will be learning about different types of animals, what they eat and their natural habitats. We will learn about how people celebrate Chinese New Year and Easter as well as talking about special books different religions use.

Using IT we will learn to create a simple booklet within Purple Mash. We will explore the magical world of Paint 3D to create an animal that we can rotate around the screen and then, with the magic of AR, place into our classroom environment!

Our Core Values

- Courage
- Responsibility
- Compassion
- Respect
- Fairness
